Any other comments on your Lecturer's teaching?

Great, engaging lectures which were effective at delivering intuition and content.

The lecturer was fantastic and really engaging. I really enjoyed the module.

Professor John gave the best class I had in the overall Master's. It was engaging with interesting applications and he explained everything very well.

The style of the lecturer was really engaging and interactive with the students. There was a good atmosphere and I felt like the prof really knows the topic. Great choice to have as a prof

What works well in this module overall?

The weekly assignments prepare you for the structure of the final exam.

John's class materials and explanations were super helpful and interesting.

The professor was extremely helpful and very dedicated. His willingness to engage in discussion and offer support was exceptional.

What would you like to see improved?

Maybe just tutorials

I like the idea of writing assignments during the semester. However, the communication regarding how these are marked could be clearer from the beginning. Even though it didn't compromise me personally, I had the feeling that it did for others .

Perhaps it might be useful to condense the earlier first few weeks with the easier material, which will allow us more time to go through the more difficult materials towards the end of the term.

Any further comments?

Loved the class, I know it was the first time Professor John taught at UCL, but I would recommend this class with him to anyone for future years. BEST PROFESSOR I HAD
